

MICRO CALIBRATION BATH

portable, 35 °C to 200 °C

Dimensions (in mm):

264 x 203 x 140 mm

Options:

- CAL-9930 : software package (windows®) included in price
- CAL-9932 : extended software package

General:

The model CAL-6102 is truly portable bath, which makes it the perfect calibration instrument for just any sized temperature sensor. Its 130 mm deep stirred temperature well is stable to within $\pm 0,03$ °C over its range of ambient to 200 °C. It works great for large diameter, short stem, liquid-in-glass, or odd shaped probes that are difficult to calibrate in a dry-well. The diameter of the tank is 63,5 mm, so you can immerse almost any size sensor. There is no need to drain the tank fluid before you carry this micro-bath to another location. Simply screw the o-ring sealed lid onto the tank and transport it spill-free.

Accessories:

- CAL-3224 : spare transport/pour cover
- CAL-3225 : spare test lid
- CAL-3226 : spare probe basket
- CAL-3227 : spare stir bar
- CAL-3228 : spare pour spout
- CAL-3229 : spare pour spout cover
- CAL-3230 : spare transport plug
- CAL-3231 : 76,2 mm extension adapter
- CAL-3232 : o-ring cover
